IM307 Software Project Management

PREPARED BY: CELESTE NG

DATE: MARCH 2025

YZU Digital Transformation & Innovation

- **History:**

- **Overview description of this program/project:** this digital transformation program involves transforming our YZ "traditional university" into a "**smart university**"

  - by leveraging cutting edge technology (from Google Cloud Platform, AWS, Microsoft Azure, IoT, 5G, AI, Big data analytics, YZU IT Services & infrastructure),

  - through innovative projects and collaborative efforts from the industry-partners, YZU educators & YZU students,

  - to enhance the educational experiences, boost university operational efficiencies & provide a cross-collaboration and dynamic learning environment.

YZU Digital Transformation & Innovation

- Let's just focus our project on this: "**Smart Student Service: Personalized student services**"

- 讓我們只專注於"智慧學生服務：個人化學生服務"

YZU Digital Transformation & Innovation

- As a student, please think of the services that you need in the campus in relation to your role as a student, class-monitor, and a graduating student.
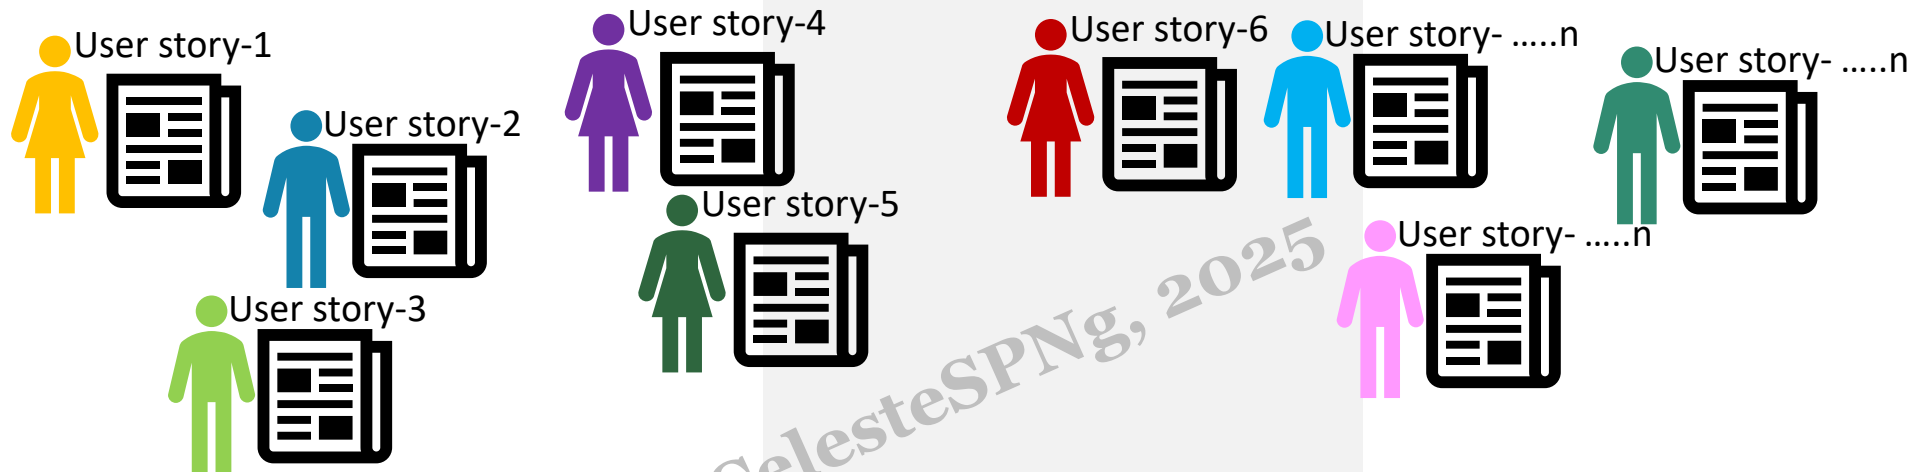

HOW:

HOW? ➜ create "USER STORY"

❑ Provide your user story in the following format:

User story:
- I am ….., and I want ……… so that ………….."

YZU Digital Transformation & Innovation

User story-1

User story-2

User story-3

User story-4

User story-5

User story-6

User story- …..n

User story- …..n

User story- …..n

- Some examples of the resulting AI system's **functionalities or features**:
  - Tutoring and study groups,
  - Counseling services – mental & career,
  - Personalized academic advisors,
  - Course recommendations,
  - Course & graduation performance indicator,
  - Scholarships,
 - Internship & volunteer service AI matching

Group Assignment – 2: user stories → feature & epic

Task 2: identify "features" and "epics"

YZU Digital Transformation

- **Based on your list of user stories, group them into "features" and "epics".**

- The diagram here is an example for you to start with:

Epic

Epic
→ Features
  → user stories

Features

User story

YZU Digital Transformation

- **Based on your list of user stories, "features" and "epics", draw a product roadmap.**

- The diagram here is an example for you to start with:

I drew this using PowerPoint template

PRODUCT ROADMAP: YZU-Student Services

@ 2024, CelesteSPNg

"Smart Student Service: Personalized student services"

TASK
Develop algorithm

TASK
Design UI

TASK
Implement backend system

TASK
Design reminder system architecture

TASK
Develop functionality for custom setting

TASK
Integrate with existing calendar applications

TASK
Curate library of study materials

TASK
Implement user profiling

TASK
Develop adaptive learning algorithms

TASK
Partner with career services

TASK
Design career assessment tool

TASK
Implement networking features (with alumni and industry)

PROJECT START

DEC | JAN | FEB | MAR | APR | MAY | JUN | JUL | AUG | SEP | OCT | NOV | DEC

Q1
Feature-1: Personalized Class Recommendations

Q2
Feature-2: Automated Reminder System

Q3
Feature-3: Personalized Study Resources

Q4
Feature-4: Career Guidance and Support

Show your answer here **(in Whiteboard, TEAMS)**

- 4A:

Show your answer here (in Whiteboard, TEAMS)

■4B:

YZU Digital Transformation

ADDITIONAL Task: list your Work Breakdown Structure (WBS)

- **Based on your list of "features" and/or "epics", draw a product roadmap.**

- This is an example for you to start with:

An example of a work breakdown structure (WBS) for the "Smart Student Service: Personalized student services" project, based on the four features mentioned earlier and their respective tasks:

1. Feature 1: Personalized Class Recommendations
•**1.1 Develop Algorithm for Analyzing Academic Interests and Career Goals**
•**1.2 Design User Interface for Inputting Preferences**
•**1.3 Implement Backend System for Generating Recommendations**
•**1.4 Conduct Beta Testing and Gather User Feedback**

@Celeste SP Ng, 2025

YZU Digital Transformation

ADDITIONAL Task: list your Work Breakdown Structure (WBS)

- **Based on your list of "features" and/or "epics", draw a product roadmap.**

- This is an example for you to start with:

2. Feature 2: Automated Reminder System
2.1 Design Reminder System Architecture
2.2 Develop Functionality for Setting Custom Reminders
2.3 Integrate with Existing Calendar Applications and Student Portals
2.4 Conduct User Acceptance Testing and Refine Based on Feedback

3. Feature 3: Personalized Study Resources
3.1 Curate Library of Study Materials
3.2 Implement User Profiling for Learning Styles and Preferences
3.3 Develop Adaptive Learning Algorithms
3.4 Integrate with Course Management Systems

4. Feature 4: Career Guidance and Support
4.1 Partner with Career Services for Job Market Data
4.2 Design Career Assessment Tools
4.3 Implement Networking Features
4.4 Launch Comprehensive Career Dashboard

THANK YOU!
